# WATER NEEDS

## Planning a wet rental?

A working water source is needed for water slides and other wet-use inflatables.

## Hose access

Have a garden hose available that reaches the setup area. Confirm hose arrangements before delivery.

## Keep water available

Some wet rentals require a continuous water supply while in use. We will explain the needs for your unit.

## Choose the right setup area

Plan for splashing and runoff. Keep the area clear of electrical equipment and other hazards.

## Dry rentals

Only use water on inflatables approved for wet use. Ask us if you are unsure.
